

1.15 format	14
2D DFT	253
680X0 family of microprocessors	584
68000 bus signals	574
68000 microprocessor	573, 584

A

A-law	373, 393, 394, 441
A-law PCM	378
Absolute k error	464
AD569	516, 521
AD588	521
AD1332	516, 523
AD1334	542
AD7590	524
Adaptation speed control	389
Adaptive differential PCM (ADPCM)	383
algorithm	383
decoder	392
encoder	385
Adaptive filters	135
Adaptive predictor	386
Adaptive quantizer	387
Address decoder	556, 580
ADOP07	523
ADSP-2100A	1, 541
ADSP-2101	2
ADSP-2101 instruction set	9
ADSP-2101/2	567
Aliasing	88
All-pole lattice filter	84
All-zero lattice filter	81
Alternating buffers	553
ANSI recommendation T1.301-1987	383
Anti-alias filter	88, 90
Anti-imaging filter	93, 104
Arbitration	555, 566, 568

Arctangent approximation	54
Assembler	10
Assembly language	8
Autocorrelation function	357, 358

B

Beam pattern	506
Beamforming	501
Bias	33
Bit reversal	173, 229
Bit-reversed addressing	272
Block floating-point scaling	150, 182,
256, 276	
conditional	153
unconditional	152, 178
Boot circuitry	7
Built-in digit reversal	225
Bus comparators	549
Bus grant	571
Bus request	569
Bus sharing	566
Butterfly	145, 181, 216
Byte addressing	573

C

C Compiler	11
Cache memory	4
Cascaded biquad IIR filter	77
Cascaded filters	114
CCITT recommendation G.711	373
CCITT recommendation G.721	383
Circular buffers	67, 96, 98, 109, 270
Code-compatible	2
Codec	374, 441
Combined loops	215
Common logarithm	61
Communication ports	567

Index

Companding 373, 393, 441
Complex-valued stochastic gradient 436
Complex-valued transversal filter 433
Computational units 2
Configuration 512, 526
Contention 547, 555
Continuous-time sampling 88
Continuous-time signal 103
Control registers 577, 578
Cosine table 221
Cross-correlation 358
Cross-software development system 10

D

Data address generators 2, 5
Data format 304
Data memory paging 547
Data memory space 514
Data scaling 150
Decimation 87, 88
Decimation algorithm 95
Delay lines 98
Digit reversal 213, 223
Discrete fourier transform (DFT) 141,
253, 457
Discrete-time sampling 89
DIVQ instruction 15
DIVS instruction 15
DMA 575
DMACK 521, 556, 575
Double-precision FIR transversal filter 70
Double-precision stochastic gradient 138
Download 551
Dual-port memory 469, 554, 568
Dual-tone multi-frequency (DTMF) 441
 decoding 457
 dialing demonstration 453
 digit generation 444

E

Edge detection 72
Emulator 10
EPROMs 517, 520
Euclidean distance 438
Evaluation board 10
Excess code 33, 45
EXPADJ instruction 153, 168, 178
Exponent 33
Exponent detector 57

F

Fast fourier transform (FFT) 133, 141,
253, 457
 FFT butterfly 145
 radix-2 decimation-in-frequency 160
 radix-2 decimation-in-time 142, 181
 radix-4 decimation-in-frequency .. 193, 215
FIFO memory 513, 520
Finite impulse response (FIR) filters 67,
93, 317
Fixed-point format 14
Fixed-point to floating-point conversion 2
Flags 572
Floating-point format 14, 33, 293
Floating-point operations
 addition 42
 division 47
 multiplication 45
 multiply/accumulate 48
 subtraction 43
Floating-point to fixed-point conversion 37
Format encoder 378
Frame 569
Function approximations 51

Index

G

GAL	582
Goertzel algorithm	458
Feedback phase	461
Feedforward phase	461
Graphics processing	293
Gray scale	290

H

Hamming window	247
Handshaking	527, 553
Hanning window	247
Hardware busy logic	568
Hardware handshake	572
High-speed data communication	433
Histogram	290

I

I/O switches	550, 552
IEEE 754 standard floating-point format ...	34
Image processing	285
Images	88
In-circuit emulator	11
Index memory	535
Infinite impulse response (IIR) filter	75, 93
Cascaded biquad IIR filter	77
Direct form IIR filter	75
Instruction cache	5
Interpolation	87, 103
Interpolation algorithm	110
Interpolation filter	107
Interprocessor communications	565
Interprocessor data transfers	581
Interrupt logic	569
Interrupts	517
Interrupt vectors	2
Intersymbol interference	433
Inverse adaptive quantizer	385, 389
Inverse FFT	230

K - L

Keypad	450
Lattice filters	81
Leakage	244, 464
Left-handed coordinate system	296
Levinson-Durbin recursion	356, 358, 359, 361, 362, 366
Line lists	293
Linear predictive coding (LPC)	355
Linear predictive coding synthesizer	370
Linker	10
Logarithm approximation	61

M

Mantissa	33
Master firmware	525
Master-slave configuration	565
Matrix multiplication	295, 297
McLaren series	51
Memory bank	546, 549
Memory buses	3
Memory mapping	550, 559, 575
Memory pages	547, 548
Memory swapping	569
Microcomputer	2
MODIFY instruction	155, 286
Modularity	510
Multiprecision fixed-point operations	
addition	18
division	29
multiplication	23
subtraction	21
Multirate filters	87
Multistage filters	125

Index

N

Narrow-band spectral analysis 133
Natural logarithm 61
Noninteger rate change factor 114
Nonstandard ADPCM transcoder 393, 418
NORM instruction 42, 44, 62
Normalization 33, 305
Number representations 13
Nyquist frequency 88, 445

O-P

Optimized one-dimensional FFTs 181, 215
PALs 582
Perspective 300
Ping-ponged buffers 126, 569
Pitch detection 366
PMD-DMD bus exchange 4
PMDA 545
Polygons 293
Predictor coefficient update 390
Program memory space 545
Program sequencer 2
Projection 301
PROM splitter 11
Pulse code modulation (PCM) 373
 A-law PCM decoder 380
 μ -law PCM decoder 376
 μ -law PCM encoder 374

R

Radix-2 decimation-in-frequency FFT 160
Radix-2 decimation-in-time FFT 142, 181
Radix-4 decimation-in-frequency FFT 193, 215
Random number generation 64
Rate compressor 93
Rate expander 107
Reconstruction 103
Reconstruction filter 104
Ripple 125, 126
Rotation 299
Rotational transform 295
Row-column decomposition 253, 254
RTI-817 517, 539

S

Sampling clock 518
Saturation 69
SB register 153
Scaling 299, 305, 466
Scrambling 173
SE register 13, 15, 29, 41, 57, 61, 288
Second harmonic 472
Semaphore logic 568
Serial communication ports 8, 567
Shading 506
Simplified butterfly 216
Simulator 10, 12
Sine approximation 51
Sine computation 444
Single-precision
 FIR transversal filter 68
 fixed-point division 14
 matrix multiply 288
 stochastic gradient 136
Slave firmware 534
Smoothing 72
Software flags 556
Software handshake 572, 577
Sonar 501
Spatial filter 502
Speech analysis 355
Square root approximation 57
Standard ADPCM transcoder 397
State machine 453
Static RAMs 545, 547
Stochastic gradient 135
Synchronizing multiple ADSP-2100s 558
Synchronous coding adjustment 394
System builder 10
System cycle 512
System specification 318

T

Taylor series 51
Time-delay beamforming 503
Timer 8
Tone and transition detector 391

Index

Tone detection	457
TouchTone	441, 443
Transcendental functions	51
Translation	299
TRAP	572
Twiddle factors	145, 181, 216, 221, 231, 257, 270
Twist	472
Two-dimensional convolution	285
Two-dimensional DFT	253
Two-dimensional FIR filter	72
Two-word format	34
Twos complement	13

U-V

Unscrambling routine	175, 223
Variable width bit reversal	174
Vector scaling	295

W

Weighted delay-and-sum beamforming	503
Windowing	247, 507
